Dear Fellow Forex Trader,

Welcome to the "Two Percent Daily" method.

I want to share my profitable Forex trading system with you as I know how hard it can be learning to trade the Forex successfully, with so many Forex trading products out there. I have been there myself. After years of trading with every manual and automated Forex system I could find, I finally began making Forex profit around 2% every day trading my own way. I started with a modest investment that has grown substantially by gaining 2% every trading day. I have compiled an e-book that explains my profitable Forex trading system. Including entries, exits and Forex risk management. All the hard work has been done for you.

This is the best Forex trading system that consistantly makes profit now and will continue to in the future as it is not dependant on market conditions. This method adapts to any market situation - ranging or trending. You do not have to avoid news and can be done trading for the day in a couple of hours at the most. Importantly, it incorporates excellent money management.

Personally I am a very money conscious person and do not like losing. My method reflects this as it minimizes the potential for a loss as much as possible by immediately locking in profit whilst milking the trade untill the very end with a tight trailing stop. Again, emphasising the excellent Forex risk management.

Why am I sharing this profitable Forex trading system? Because regardless of how many people use it - it will still work. Infact, the more the merrier! I remember how hard it was trying to find my way in the Forex and now that I have succedded I want to help those who may have been misguided by other Forex trading products or constantly losing money to turn their fortunes around and become wealthy. There is more than enough money in Forex for all of us!

I hope you make the right decision to join me and my successful customers on the money

train and ride the Forex tracks! Take advantage of this once in a life time opportunity while the method is on offer. I also offer life time support and will respond to queries within 24 hours. The aim is for me to ensure that you make back the cost of my e-book and start making Forex profits as soon as possible. I will assist you all the way.

Sincerely,

Richard

I tried out the 2% system yesterday, pretty impressed with 5 wins. Makes a great manual system for just 2 or 3 hours a day. I had another successful day with Mr. 2% on Thursday, 5 trades & 5 wins. I only traded the Shorts in the down swing. Add that to Monday (45 pips) and Tuesday (52 pips). This is a VERY GOOD Trading System. Had 19 winning trades and just one loss of 12 pips.

Today was a great example of the power of your system. The first trade was a 10 pip winner, the second trade this morning was a 10 pip winner, followed by the third trade that again was a 10 pip winner! I was up 6% in 1 ½ hours! I really like the format of your system and use it on all of the charts that I have open.

I have been using this method since July, and I average at least 10% a week! I love this system and will be promoting it starting this month. As an existing customer I am very interested in the automated Forex robot. When will that be out? Thanks for a great system!

Hello Richard,

Good number of pips from your trading method so far this week – especially after the PMI announcement on Monday – 37 pips!

Kind Regards,

Mark.

Hi Rich,

Just got my 10.8 pips for the day trading manually on the bar beginning 0815 your time. Thanks for releasing the EA. I still enjoy trading manually and intend to continue that. I have also found MB Trading (who you recommended in the updated manual) to be excellent - for spreads, execution etc.

Kind Regards,

Mark.

Rich,

In the last 6 days the EA made a nice 13.8% return in a traditionally poor trading time of the year.

Thanks,

Mark.

Hi Rich,

I was up $600 on an original bank of $2,000, in only 3 weeks trading. That's over a 30% gain. I've got to be happy with that. It has also been very consistent so far. Therefore I am very happy with the EA so far.

Thanks again, your the man!!!

Hi Rich,

The beauty of your system just keeps right on going. I continue to run side by side comparisons of the different settings that I am using and both of them

continue to make money. Yesterday was a bank holiday in parts of Europe, which in the past meant that I would have skipped the day trading. Your EA made a very nice 23.1 pips on four winning trades. This morning have again a very nice 23.5 pips in the bank. As we discussed before I will be moving the lots up in the coming weeks and plan on risking 2% per trade in early February. If I had been trading at the 2% level this week I would be up 8% in two days. I know that there will be down days and weeks but now that I have seen the performance of the EA over the past month, seeing these drawdowns will be easier to take.

Thanks again for the product and I will keep you posted on comparison results for different settings.

Mark.

Rich,

The performance of the EA continues to be strong for the week! Since I traded the manual system before the EA I know what it is doing and I have a high level of confidence with the overall plan. Looking forward to more good updates from you and want to encourage you to keep plugging away!!

Thanks,

Mark

Rich, Had a nice solid 3% yesterday on three trades, done in two hours and thirty minutes! I like the feel of this type of trading as well. I did not need to stare at the charts since most of the time it takes a while to reverse far enough to get you into a new trade. I would win one and do other stuff while I waited for the trades to come to me!

Mark.

Rich,

Been trading Forex for a few years now fulltime, and I am impressed with your system.

Purchased and looked it over this weekend, and started trading with it today. Pretty quiet here on Monday's in the US, but still got my 2% on 3 accounts.

Thank you for selling a system that actually does what it claims to do .....there is alot of BS out there floating around. This is one of the best Forex trading products I have purchased.

Best Regards,

Erik.

Rich,

The manual trading following your profitable Forex trading system is very solid and produces pips each day.

In fact as I am writing this, the EA just closed a cable position on each of my accounts for 7 pips!!

Regards,

Erik.

Thank you Rich. The manual trading has been going excellent even last week and today with the lower volume in the market.

Best Regards,

Erik.

Rich

Thank you for your reply. Thank you again for sharing the great manual system and creating an EA that follows the same rules. Even after trading full time for a few years now, your system has allowed me to grow my accounts by 2-4% each day....I feel very fortunate that I came across your website.

If there are any other "tips" that you come across that will help fine tune what we are doing please pass them along.

Have a safe and Happy New Years Eve!!

Rich,

Just wandering how you been Rich?

So far my account is growing. Sooner or latter the account will get huge if it stay's on track. What I do

love about your ea is with it's style and tight SL you don't need a huge account to be trading big money and still stay within range of money management %! By far Bro the best EA I have ever tried and I have tried close to 100.

Stay in touch Bro,

Eddie.

Hey Rich,

Your ea has been kicking butt this week! It has made me $600 and my account is doing great!

Dear Rich, The markets held out well today before the move. I was hoping for a move to the upside following the asian move down, but this weren't to be. Anyway took the sell and decided to go for just 10 pips without a trailing stop, as I thought if its not making any attempt to go up it must go down. Also took into account the big move down. Another winner, this is brilliant and I thank you for sharing it with us. It has to be one of the top Forex strategies revealed! Many thanks,

Julian.

Dear Richard,

I am writing just to let you know how happy I am with your system. I purchased your 2% daily program a little while ago, and have been having the best success with it of any Forex strategy that I have tried and I have tried many Forex trading products. I use my own trading platform (because I am use to it), but I use your "map" to see where the entry points are. I have been very successful for the last 3 days, and couldn't be happier. I will be referring people to you in the near future ! Also, if you every get to your "automated" goal,

please keep me in mind...I trust the work that you do, and know that you won't steer us wrong! !"

Thanks again,
Russ.

Thank you for allowing me the opportunity to use your personal Forex scalping system! I traded it for a week on demo and had great results so decided to go live. That was over two months ago and I am so glad I did! My account is growing everyday and my lot sizes steadily increasing! I am suprised you are sharing such a gold mine but forever grateful! I told myself that I would never buy Forex software but I am glad I did.

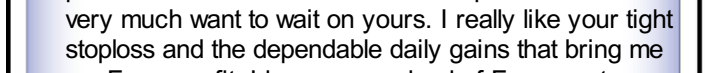
Steph.

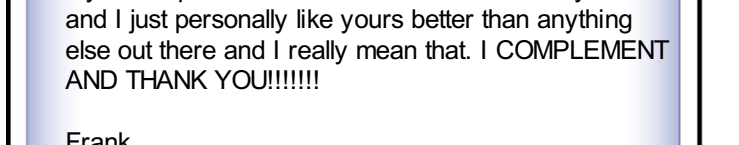
Hello: I hope you are doing well . You have a very good Forex system and I thank you. Today I took the first trades given and I was five for five up 10 % on my account.

Thank You! Frank.

Hello: I just wanted to check back with you to see if your automated Forex robot is getting closer... I have seen alot of automated Forex robots and Forex trading products advertised over the last couple of months but I very much want to wait on yours. I really like your tight stoploss and the dependable daily gains that bring me my Forex profit. I have seen a load of Forex systems and I just personally like yours better than anything else out there and I really mean that. I COMPLEMENT AND THANK YOU!!!!!!!

Frank.





Hi Rich,

It's Paul from Iamfx.com

I purchased the 2% a day method. Being a trader myself, I recognize a solid system when I see one. The two percent method is based on solid price action principles and looks to be a profitable Forex trading

system.

Kind Regards,
Paul.

This method has a VERY low risk/high reward, and is based on sound trading logic. It has an AMAZING risk/reward profile, and makes this method accessible and profitable to those with as little as $100. This strategy is one of the few that works brilliantly in BOTH ranging and trending markets.

Jeremy.

Rich, I purchased your Forex trading product several weeks ago, but haven't tried it until today. I'm up 44 pips.

Hi Rich,

The trading continues to go well using your Forex scalping system, thanks for putting this out for others to use.
I have found that the eur/usd is another good pair to trade the system on and sometimes offers the earlier opportunity to get a good trade off.
From your last email you stated that you had some tweaks to perform on the automated Forex robot and I am wondering how the results are.
I have some more travel coming for work in early 2011 and would love to be able to plug in your robot and have it trade the system for me on those days that I am unable to watch the market at the right times.

I really appreciate your customer service – you reply to all questions with good answers just as you said you would.

Thanks,
Mark.

Hi Richard!

The automated Forex robot has performed well today. Thanks for the update! You have made a good system here, and I guess you know of other Forex trading products that are good and bring the Forex profits also. I would be happy to know which ones you know to be good (the best ones), both EA's and manual systems. When one comes across someone who delivers on their promises, it represents a breakthrough, because most people don't.

Thanks
